---

The Bay Area Air Quality Management District (BAAQMD) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants ("air pollutants") located within 1,000 feet of a school site, State law requires that we notify the public and inform residents that there is a 30-day period for public response to the proposal. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the BAAQMD for the above referenced source(s) of air pollution. A description of the proposed project follows:

Installation of an Emergency Standby Diesel Engine/Generator, Cummins Onan, 750 Hp, 224 kW for Club Quarters, 424 Clay Street, San Francisco.

**The Bay Area Air Quality Management District has determined that the project will comply with all applicable air pollution control requirements and that the increase in health risks resulting from air contaminant emissions from the proposed source(s) are within satisfactory levels. Accordingly, the BAAQMD plans to issue a Permit to Operate for the proposed project.**
